## PERSONAL PROJECTS

Text-Transform

- Text transform is a simple tool to manipulate the text ,text transform can convert the text into uppercase as well as into lower case it can count the number of words in your text and number of characters ,it can remove extra space from your text and i have added a feature which can change the mode(light to dark).i have used React.js. [↗](#)

Snake Game

- The snake game simple game where a snake moves around a box trying to eat an fruit.it is single player game which i have created using **Html,css,Javascript**. and idea is to do this project to understand the movement of keys .this project is in a webpage. [↗](#)

Note pad

- this is a simple project which i have made in **Html,css,Javascrrip,Bootstarp** which stores the notes in local storage. [↗](#)

Shopping -cart

- this is a single page application which i have done using React.js. in this project the my idea is to create a environment like actual Shopping -cart .in this we can add the item ,remove the item we can display the item .and we can also increment ,decrement the quantity of items and getting total amount
